## **Chapter 1: SNAPPY VMS Installation**

### Installation Step:-

The Snappy VMS Standalone installer will check & install the following features that are required by the snappy VMS server when it was not already installed in the target machine

- 1. .Net Framework 4.6.1
- 2. SQL EXPRESS 2016
- 3. IIS Configuration

You can also find the help document for the individual installation of the above software & features in our website if you wish to perform individual installation of each software.
