Video Wall

- Control room are a vital component of any major operation. Be it traffic management, security, surveillance, process control or utilities, Control room are building blocks of city wide management.
- Ensuring access to every intricate detail and real time information has become a necessity for control room operators. With Video walls, round-the-clock vigilance and monitoring in real time has become convenient and manageable. Features like true cube redundancy and long life hours of light source in a video wall ensure a long term performance in mission critical applications.

- Ergonomic control room furniture and auxiliary equipment specially designed for the long-run and built to last in 24/7 environments that meet and exceed the highest control room design standards.
- Control room operators are not static robots. They are human beings who thrive on variety, stimulation, activity and choice. Each individual has different dimensions and can have a different cone of fixations, line of sight, near-point, field of vision and postural preferences within a given task zone.

Furniture

- When one is looking to protect persons (from noise) by the means of a cabin (for soundproofing or soundproofed), A wide range of soundproofed control room for industry for many applications of soundproofing / acoustic insulation related to the protection of workers against noise.
- The Powerful solutions at a reasonable cost in response to all the needs in the matter of soundproofing (preventive or curative) by the means of ergonomic equipment (standard or tailor made) for which the quality of design and of execution meets the highest level of requirement in this area for an efficient fight against noise in the context of compliance with legislation on noise at work or of improvement of working conditions.

Soundproof

Switch glass is the cutting edge in glass technology which has the power to control transparency, making it the smartest glass around. Switch glass you can make transparent glass translucent, to block visibility, with the click of a button.

- Works with an electric switch or a remote-control device.
- Activates in less than ten microseconds.
- Blocks UV rays that are harmful to the skin.
- The interlayer behaves like a security film.
- Ensuring safety.
- Its acoustic properties help dampen outside noise.
- Lasts a minimum of 20,000 cycles.
- Low power consumption.
- A variety of color tints are possible.
