

# MOBILE TICKETING SERVER WITH APPOINTMENT

QUEUING ANYWHERE WITH MOBILE TICKET

Your Phone is Your Ticket

Give your customers the ability to access your services without having to physically wait in line. Snappy Mobile Ticketing Server enables customers to wait anywhere, monitoring their progress in real time, and receiving notifications when it's their turn to be served.

As customers can wait remotely, you can implement safe queuing and social distancing on the premises.

## Snappy Mobile Ticketing Features

### Select the nearest branch

Customer uses App to get a Mobile Queue Ticket Virtual Number before arriving to Branch. Your customer can choose their nearest branch we aimed to eliminate crowded areas and physical waiting lines.

### Check your status

The customers can get real time of the ticketing status. This will improve and optimize your operations along with extensive statistics.

### Navigate to the branch

Through the Google Map the customer can navigate to branch, so the customer can get approximate travelling time to the branch.

### Select the service required

Let customers choose single or multiple services at the same time. Snappy Mobile Ticketing App supports English/Arabic. While booking the ticket, the customer is getting a virtual ticket with approximate waiting time.

### Select the service required

Your customers can book an appointment with just a few clicks. The Snappy Mobile Ticketing app issues real-time service tickets for desired service locations and shows the estimated waiting time to facilitate your customers.
